

## **Can your company's dental plan contribute to a healthier bottom line?**

Yes, if it takes advantage of a growing body of research that shows the connection between a healthy mouth and overall health. As Rhode Island's leading dental insurer, Delta Dental has always led the way by focusing on early detection and prevention. We were the first to offer brush biopsies to identify oral cancer. First, too, to educate parents about the dangers of Early Childhood Tooth Decay. Now, we're introducing an innovative new dental plan that uses the latest scientific evidence to determine the best treatments – and coverage – for our members. By identifying potential medical conditions earlier, and taking preventive steps to fight dental decay, we can help impact health care costs, and improve patient outcomes. And the benefits are not just monetary. We're helping to enhance the quality of people's lives. For more information, talk to your broker or Delta Dental account executive, or visit [www.deltadentalri.com](http://www.deltadentalri.com).
